

Logan Kulinski

PROFESSIONAL SUMMARY

Experienced Software Engineer with a strong background in full-stack development, system integration, and API design. Proven ability to deliver scalable, high-performance solutions that drive business success. Passionate about continuous learning and applying innovative technologies to solve complex challenges.

EXPERIENCE

Synop

Nov. 2022 – May 2024

Software Engineer

Chicago, IL (Remote)

- Integrated the Synop platform with third-party energy systems, enhancing data exchange efficiency and reducing manual intervention.
- Developed and deployed scalable APIs to manage charging and energy usage, contributing to improved system reliability.
- Introduced innovative frameworks and techniques to advance the Synop platform, leading to greater codebase maturity and maintainability.

RealtyAds

May 2022 – Oct. 2022

Software Engineer

Chicago, IL

- Led platform design discussions and facilitated cross-functional collaboration to deliver robust software solutions aligned with business objectives.
- Supported external partner integrations, ensuring seamless connectivity and enhancing the platform's overall capabilities.
- Enhanced the RealtyAds platform, directly contributing to successful client engagements and improved customer satisfaction.

RealtyAds

June 2021 – April 2022

Junior Software Engineer

Chicago, IL

- Collaborated with various teams to implement services that increased exposure to client pursuits and drove higher engagement.
- Developed tools for sales teams, streamlining the prospecting process and improving lead conversion outcomes.
- Contributed to the evolution of the RealtyAds platform, strengthening its competitiveness in the market.

Purdue University

June 2017 – May 2021

Course Coordinator

West Lafayette, IN

- Developed and delivered Computer Science coursework, focusing on object-oriented programming principles, to improve student comprehension and application.
- Managed course staff hiring and operations, ensuring effective teaching and support for a large student body.
- Lectured on key programming concepts, contributing to an improvement in student exam performance.

EDUCATION

Purdue University

West Lafayette, IN

Specialized in Software Engineering and Systems Programming

Aug. 2016 – May 2021

SKILLS & INTERESTS
